TOPRINSE HD

Acid Rinse Additive

The Innovative
Warewashing
Solution

- Extra sheeting additive accelerates drying on all tableware for sparkling results under hard water conditions
- Designed for all water conditions
- Helps to prevent lime-build-up in rinse zones

TOPRINSE HD

Machine Warewashing Acid Rinse Additive

Product Description

TOPRINSE HD is an acid rinse additive for use with all water conditions, developed to accelerate the drying process on tableware for sparkling results. TOPRINSE HD contains high performance wetting agents, which eliminate the need for additional hand drying.

Use Direction

1. Your Ecolab specialist will install and adjust the EASYPLUS Warewashing Hygiene System to the correct concentration – to your specific cleaning needs.
2. Check rinse additive level regularly, and change the jug when necessary.
3. Contact your Ecolab Territory manager for further instructions.

Safety

Wear protective gloves and safety glasses when you exchange the empty container with a new one.
Do not mix with any other product!
For further information and safety instructions see product label and safety data sheet.

Recommended use-concentration

0,2 – 0,6 g/l per litre rinse water depending on soil level, water quality and used tableware.

Packaging

10l
20kg
200kg

Storage conditions

Store only in the original container and between 0°C and 40°C.

Dosing Equipment

Ecolab's high quality dosing equipment ensures the best economical and ecological method of dosing all TOPRINSE products.
See the ECORINSE L cat sheet for detailed information.
